

Thank you for joining us for our first ever virtual tech and manufacturing job fair.

The [NH Tech Alliance](#), [NH Department of Employment Security](#) and [NH Department of Business and Economic Affairs](#) are pleased to partner in bringing this event to NH.

Sponsored by [Market Street Talent](#) and [Leddy Group](#).

Below you will find a description and contact information for approximately 50 different employers, educational options, and service agencies in NH that are looking for candidates or here to help you. There are hundreds of jobs represented in a variety of roles.

Read through the employers and roles, identify the ones you are interested in speaking with at the job fair and mark them. At the job fair you will find that each employer has their own table. Visit that table to talk to the representative. You will not be directly applying, but instead having a good conversation. The employers are also listed with their website and career pages as well as the contact information so you can follow up.

Event Links

<https://live.remo.co/e/candidate-training-for-nh-tech-a> is for the orientation Tuesday at Noon

<https://live.remo.co/e/new-hampshire-technology-and-man> is for the main event Wednesday 11am to 1pm

The best browser for Remo is Chrome or Firefox.

[You can test your equipment on this page ahead of time.](#)

Lonza

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their idea, big and small, genuinely improve the world, and that's the kind of work we want to be a part of.

Lonza's Portsmouth, NH site is excited to announce new opportunities that offer individual growth and mobility in an organization that champions innovation and team accomplishment. This is what has made us a global leader in the biotechnology industry as evidenced with Moderna's partnership with Lonza to manufacture a Covid-19 vaccine.

MilliporeSigma

MilliporeSigma - A Leader in Life Science

Our pursuit is progress for people everywhere. That's why we take a closer look at things, ask questions, and think ahead.

We've been around for more than 350 years, yet our majority owners are still the descendants of Friedrich Jacob Merck, the man who founded our company in Darmstadt, Germany in 1668.

Our purpose is to solve the toughest problems in life science by collaborating with the global scientific community – and through that, we aim to accelerate access to better health for people everywhere.

We provide scientists and engineers with best-in-class lab materials, technologies, and services. With the 2015 combination of EMD Millipore and Sigma-Aldrich, we now have a broad portfolio of 300,000 products, an expanded global footprint, and an industry-leading eCommerce platform.

Single Digits

Single Digits is a leading global provider of High Speed Internet Access (HSIA) management and support solutions, guest/resident management software and technical support services. We offer a complete guest and resident HSIA solution, including components of IP network design, engineering, professional services, ongoing maintenance, networking monitoring, multi-lingual support, revenue reporting and authentication tracking. Our sound business fundamentals – on which the company was created – have led to exceptional growth, profitability and recognition.

Our innovative Broadband Authentication Platform (BAP) empowers properties to tailor their HSIA to the unique needs of a variety of industries, including hospitality, property management, health care, government, education, travel and more. Thanks to our managed service business model, our clients are able to boost revenues, strengthen customer loyalty and better promote their own brands without capital expenditures.

Techneeds LLC

Our team has been serving this market for decades and knows what local employers are looking for in their new hires. The reason for our success is that we get to know our job seekers just as well. Your resume only tells a part of your story.

At Techneeds, we can connect you to opportunities you won't find anywhere else. Leading employers call us first when a position needs to be filled. Instead of job boards, they rely on our team to find the right person for both temp and temp-to-perm opportunities.

Instead of getting lost in the shuffle of hundreds of other online applicants, you'll be marketed directly to the hiring manager if you're a match for one of our clients' openings.

Senior Hydropower Engineer with about 15 years of design experience, a PE, and a BS in Civil or Structural Engineering.

Thompson Investment Casting

XPRIENCED, QUALIFIED, DEPENDABLE

Thompson Investment Casting, first began manufacturing high quality investment castings in 1946.

Since those early days, investment casting has gained rapid acceptance because of its substantial cost savings over alternative manufacturing methods. Parts can be produced to net or near net shape with improved physical properties. The result is that investment casting has

assumed broad applications, particularly in today's high tech, medical, commercial, sporting and industrial fields.

At Thompson Investment Casting, we combine the latest technology with years of experience in pouring most steel alloys, pure copper, copper-base alloys and some aluminum. We produce extremely complex shapes as well as castings with fine detail, smooth surface finishes and cross sections as thin as .020 of an inch. Our weight and size capabilities vary from more than one hundred pieces per ounce to castings weighing over 30 pounds.

Over the years, Thompson Investment Casting has developed a reputation for precision, quality and service. These traits have become the hallmark of our success and have enabled us to assume a leadership role in the casting business.

URSA, Inc.

URSA integrates diverse sets of UAV system telemetry data within a single, vendor-agnostic analytics platform for the DoD and security industry.

The URSA Platform validates the performance of unmanned systems and their associated sensor tracks, such as Counter-UAS platforms. We standardize telemetry data outputs from each system and sensor. Then we pull the data into a single location for forensics, intelligence analysis, and predictive maintenance. We deliver a software solution that enables users to run customizable analytics on demand for multiple systems built by multiple vendors.

Whitney Brothers

Whitney Brothers® was founded in 1904 as a producer of wooden toys. Many years later, our brand correctly spotted the opportunity to invent and pioneer the commercial distribution of wood furniture for Early Learning and Institutional Childcare environments, markets in which we operate to this day. Our products are available through carefully selected educational distributors, dealers and retailers that sell to schools, childcare centers, Head Start facilities, churches, libraries and museums in North America and throughout the world. While much has changed over 116 years of our brand's rich history, our sole focus has endured: To create products of the highest quality that delight and inspire children to learn.
